

### King Shocks

King Shocks offers two new shock sizes. The 3.5-inch and 4.5-inch diameter Pure Race Series Bypass Shocks from King are built to handle the largest tire and wheel sizes and the sustained high speeds achieved by the fastest unlimited race vehicles. These shocks deliver dramatically different damping characteristics and have a long list of new features to optimize their performance. Contact King Shocks, 12842 Joy St., Garden Grove, CA 92840; 714/530-8701.

### High Tide Products

The Coolant Catcher, from High Tide Products, has a low profile and easy movement via 360 degree swiveling casters, designed to allow easy positioning under most cars or trucks without needing a hoist or jack stands. Its baffling pad is made to prevent splashing and spillage when collecting or transporting liquid. Integral hand grips and a pour spout allow for easy emptying of the Coolant Catcher. Contact Coolant Catcher, PO Box 147, Benicia, CA 94510; 707/745-5354.

### EZcarlift

The EZcarlift was specifically designed for the weekend warrior and has the capability to raise a race car 26 inches in about 90 seconds depending on the weight of the vehicle. It can also lift up to 4400 pounds of weight, powered by a standard electric hand drill. The open design allows for unobstructed access to the underside of the vehicle from all four sides. Contact EZcarlift, 7308 Elmhurst Pl., Goleta, CA 93117; 805/331-0311.
