

Little big lift

EBM Design, Inc.'s new EZ Car Lift is a low-rise, low-profile lift that can raise a 4,400-pound car a full 26 inches off the ground using an electric hand drill for power, giving the amateur mechanic or weekend racer plenty of comfortable work space.

Available in both steel and aluminum, the lift has a total weight of less than 164 pounds, with the heaviest section weighing in at only 61 pounds. Portable and easy to use, the EZ Car Lift is perfect for group, team or club ownership. Cost: \$2,295.
