

# The latest great stuff for your driving life

■ **RE-Q** is designed to adjust the bass and treble signal of virtually any stock head unit to get the best possible response and sound when adding subwoofers, amplifiers and auxiliary speakers to a primarily stock audio system. Now you can obtain the bass you want without having to ditch your OEM head unit and factory audio controls. **\$150**

■ **Pioneer** has introduced the all-new AVIC-S2, a wallet-sized navigation and MP3 unit with Bluetooth capabilities. With its 3.5-inch color touch screen, it's small enough to throw in your back pocket or handbag, yet powerful enough to get you to and from all your desired locations while being able to listen to all your jams. **\$400**

■ **Euro Sport's Cool-Flo** intake for your 2.0T GTI or Jetta is designed and developed in-house and dyno proven on the company's Mustang Dynojet. It's engineered to impart better throttle response, increased power and improved sound. It includes mandrel-bent tubing and a conical ITG filter. And if you can keep your foot out of the throttle, Euro Sport claims you could even experience improved fuel economy due to less restriction at the point of induction. **From \$220**

■ **The TurnPro Magnetic Finger** was designed to improve on the best tools you already own—your hands. It's a snug, stretchy glove that comes with a powerful magnet under the surface of the index fingertip. The glove fits securely and the magnet allows you to hold and retrieve any small metal object with precise control. Pick up nails, screws, bolts and washers, straight pins—anything a magnet will attract. Available in two sizes. **\$11**

■ **The EZ Car Lift** is based on the same premise as a scissor-jack, the device found beneath many a spare tire. Essentially, the EZ Lift has taken the jack-screw premise and amplified it, adding adjustable runner-ramps and rollers. The end product is a portable car lift, an easy-to-transport hoist rolled beneath the vehicle allowing wrenchers some 26 inches of ground clearance. The EZ Car Lift is powered by standard hand-held electric drill and is rated to lift 4440 pounds. Its compact size will fit most mid-size trunks or SUVs or 2.9 cubic feet of garage space. The EZ Car Lift would be blessing to either the weekend racer or backyard mechanic. **\$2,295**
